

Sure Path ID™

YOUR PATH TO IDENTITY THEFT PROTECTION

Every two seconds, someone in the United States becomes a victim of identity theft. That's thousands of people every single day.

At the gas station, in a data breach of a favorite retailer, in a supposedly secure online transaction. Identity theft can happen anywhere, usually when it's least expected. And the impact is enormous.

Putting the pieces back together can be expensive, time-consuming and exhausting. Preventing identity theft with 24/7 monitoring and alerts saves employees and their employers time and money.

12.7 MILLION
